

Tap, Add, Done

Tap to Add Your Debit Card to Your Mobile Wallet - It's That Easy!

How does it work?

- Open your digital wallet app (e.g. Apple Wallet, Google Pay, or Samsung Pay)
- Select **"Add to Wallet"** (or similar) and choose the appropriate card type
- Tap your Cross County Savings Bank Visa® Card against the back of your NFC-enabled mobile device

Why Use it?

- This new feature makes adding your card faster and easier by eliminating the need to manually enter card details or scan them with your phone's camera

Is It Secure?

- Absolutely! Your data is encrypted and tokenized, just like with traditional wallet provisioning. Plus all Visa® cards added using this method require multi-factor authentication for added security
